

CODE 4

CONCEPTS

COMBATIVES FOR WEAPON RETENTION AND DEFENSE

The focus of the two-day workshop will be on officer weapon retention and defense tactics. This training is built on solid principles that officers can retain under pressure.

This training will include gear set up and options, proper clinch and grappling fundamentals, and awareness and deflection of simple attempts to disarm officers. Officers will also learn fundamental principles and concepts against dedicated disarm attempts to include weapon retention fundamental principles in the holster, out of the holster, standing against a wall/barrier, and on the ground. Fundamentals taught will include the RAT and CUTT weapon retention principles. Officers will also train I-CAT edged weapon defense, handgun takeaways, and the ACT Fundamental Principles for accessing your own firearm in a lethal engagement where the officer is entangled with a lethal suspect. Depending on time, officers may also be trained in fundamental principles of long gun retention and potential shooting platforms.
